

New RAL colour for gearboxes, machine frames and rotating parts

Dear Customers,

Due to further standardization, the standard paint finish for all drives and associated frames will be changed from RAL 7021 (black-grey) to RAL 9005 (black) from January 1, 2024.

Previously: RAL 7021 black-grey

New: RAL 9005 black

Furthermore, all rotating parts will be changed from RAL 1004 (golden yellow) to RAL 1018 (zinc yellow).

Previously: RAL 1004 golden yellow

New: RAL 1018 zinc yellow

The changeover will be phased into delivery. Due to the small difference in colour, there is no option to choose. If you have projects that require a specific RAL colour during the transition phase, please contact us.

Further service can be obtained from your LiftEquip contact person or via our homepage www.liftequip.com.

Thank you for your understanding and your support on our way to reduced complexity!

Best regards
